Germany is seen as a leader in thermal retrofit policy and practice, but how effective is its approach? *A Critical Appraisal of Germany's Thermal Retrofit Policy* examines this policy in context and assesses its effectiveness. It finds that technical constraints and the costs of retrofitting reduce the rate of progress, while planning underestimates the influence of user behavior in the form of rebound and prebound effects. A key finding is that savings can be maximized within a policy that understands the actual behavior and motivation of households, the area where most energy savings are already taking place.

The book suggests a new policy paradigm that would encourage a better balance of partial and comprehensive retrofits, utilizing household behavior changes based on a better understanding of fuel saving motivation and fuel price elasticity. In this approach, the thermal building regulations would be made more flexible so that policymakers would:

- Promote partial, transitional and cost-optimal retrofits, which are more certain to pay back through fuel savings if they are appropriate to building typology and homeowner budgets.
- Promote comprehensive retrofits for reasons other than economic gain, focusing instead on the comfort and environmental benefits of energy-efficient homes.
- Invest more heavily in educating households to heat economically, learning from the prebound effect so as to maximize the utility of the homes they currently occupy, and base payback time calculations on actual consumption.

The results and findings of this book would be of interest to policymakers, researchers and graduate students alike.

From reader reviews:

Tameika Ahmed:

The book A Critical Appraisal of Germany's Thermal Retrofit Policy: Turning Down the Heat (Green Energy and Technology) can give more knowledge and information about everything you want. Why must we leave the great thing like a book A Critical Appraisal of Germany's Thermal Retrofit Policy: Turning Down the Heat (Green Energy and Technology)? Wide variety you have a different opinion about guide. But one aim this book can give many information for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or information that you take for that, you may give for each other; you can share all of these. Book A Critical Appraisal of Germany's Thermal Retrofit Policy: Turning Down the Heat (Green Energy and Technology) has simple shape however you know: it has great and big function for you. You can appearance the enormous world by open and read a guide. So it is very wonderful.

Peter Holmes:

What do you in relation to book? It is not important together with you? Or just adding material when you want something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. They must answer that question mainly because just their can do that. It said that about book. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this specific A Critical Appraisal of Germany's Thermal Retrofit Policy: Turning Down the Heat (Green Energy and Technology) to read.

Corey Smith:

The book untitled A Critical Appraisal of Germany's Thermal Retrofit Policy: Turning Down the Heat (Green Energy and Technology) contain a lot of information on that. The writer explains the girl idea with easy approach. The language is very straightforward all the people, so do definitely not worry, you can easy to read it. The book was authored by famous author. The author brings you in the new age of literary works. You can read this book because you can read more your smart phone, or product, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site as well as order it. Have a nice learn.

Nicholas Poston:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from a book. Book is composed or printed or highlighted from each source this filled update of news. Within this modern era like right now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just seeking the A Critical Appraisal of Germany's Thermal Retrofit Policy: Turning Down the Heat (Green

Energy and Technology) when you essential it?
