**Biological Anthropology: The Natural History of Humankind (4th Edition)** Craig Stanford, John S. Allen, Susan C. Antón  
*For courses in Biological Anthropology*

## Present a rich overview of biological anthropology, from early foundations to recent innovations

*Biological Anthropology: The Natural History of Humankind* combines comprehensive coverage of the foundations of the field with modern innovations and discoveries, helping students understand, and get excited about, the discipline. Because the authors conduct research in three of the main areas of biological anthropology—the human fossil record (Susan Antón), primate behavior and ecology (Craig Stanford), and human biology and the brain (John Allen)—they offer a specialist approach that engages students and gives them everything they need to master the subject. The **Fourth Edition** continues to present traditional physical anthropology within a modern Darwinian framework, and includes coverage of contemporary discoveries to highlight the ever-increasing body of knowledge in biological anthropology.

## Also available with MyAnthroLab®
