**MRI from Picture to Proton** Donald W. McRobbie, Elizabeth A. Moore, Dr Martin J. Graves, Martin R. Prince

This book presents the basics of MR practice and theory in a unique way: backwards! The subject is approached just as a new practitioner typically encounters MRI: from images, equipment, and scanning protocols, rather than pages of dry physics theory. The reader is brought immediately face-to-face with issues pertinent to practice; filling in the theoretical background as their experience of scanning grows. Key ideas are introduced in an intuitive manner that is faithful to the underlying physics but avoids the need for difficult or distracting mathematics. Additional explanations for the more technically inquisitive are given in optional secondary text boxes.
