Natural Hazards: Earth's Processes as Hazards, Disasters, and Catastrophes, Books a la Carte Edition (4th Edition) Edward A. Keller, Duane E. DeVecchio

NOTE: This edition features the exact same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value for your students—this format costs 35% less than a new textbook. Before you purchase, check with your instructor or review your course syllabus to ensure that you **select the correct ISBN**. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, **you may need a CourseID**, provided by your instructor, to register for and use Pearson's MyLab & Mastering products.

Natural Hazards uses real-life examples of hazards and disasters to explore how and why they happen—and what we can do to limit their effects. The text's up-to-date coverage of recent disasters brings a fresh perspective to the material.

The **Fourth Edition** provides a new active learning approach, a fully updated visual program and revised pedagogy tools that highlight hallmark concepts of the text. Students have access to an updated **Hazard City**, an online media resource which gives instructors meaningful, easy-to-assign, and easy-to-grade assignments in which students investigate virtual disasters in the fictional town of Hazard City.

This program will provide an interactive and engaging learning experience for your students. Here's how:

- **Provide a balanced approach to the study of natural hazards:** Focus on globalization of our economy, information access, and human effects on our planet in a broader, more balanced approach to the study of natural hazards.
- **Engage your students with "Hazard City":** Students work through 11 different assignments by stepping into the role of a practicing geologist and analyzing potential disasters in the fictional town of Hazard City.
- **Enhance understanding and comprehension of natural hazards:** Newly revised stories and case studies give students a behind the scenes glimpse into the lives of survivors, professionals and hazardous events.
- **Strong pedagogy tools reinforce the text's core features:** The new chapter structure and design organizes the material into three major sections to help students learn, digest, and review learning objectives.
