**Algebraic Complexity Theory (Grundlehren der mathematischen Wissenschaften)** Peter Bürgisser, Michael Clausen, Amin Shokrollahi

The algorithmic solution of problems has always been one of the major concerns of mathematics. For a long time such solutions were based on an intuitive notion of algorithm. It is only in this century that metamathematical problems have led to the intensive search for a precise and sufficiently general formalization of the notions of computability and algorithm. In the 1930s, a number of quite different concepts for this purpose were proposed, such as Turing machines, WHILE-programs, recursive functions, Markov algorithms, and Thue systems. All these concepts turned out to be equivalent, a fact summarized in Church's thesis, which says that the resulting definitions form an adequate formalization of the intuitive notion of computability. This had and continues to have an enormous effect. First of all, with these notions it has been possible to prove that various problems are algorithmically unsolvable. Among of group these undecidable problems are the halting problem, the word problem theory, the Post correspondence problem, and Hilbert's tenth problem. Secondly, concepts like Turing machines and WHILE-programs had a strong influence on the development of the first computers and programming languages. In the era of digital computers, the question of finding efficient solutions to algorithmically solvable problems has become increasingly important. In addition, the fact that some problems can be solved very efficiently, while others seem to defy all attempts to find an efficient solution, has called for a deeper understanding of the intrinsic computational difficulty of problems.

### **From reader reviews:**

#### **John Moore:**

Precisely why? Because this Algebraic Complexity Theory (Grundlehren der mathematischen Wissenschaften) is an unordinary book that the inside of the publication waiting for you to snap the idea but latter it will surprise you with the secret this inside. Reading this book alongside it was fantastic author who write the book in such incredible way makes the content inside of easier to understand, entertaining approach but still convey the meaning entirely. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of gains than the other book have got such as help improving your ability and your critical thinking way. So , still want to hold up having that book? If I were being you I will go to the guide store hurriedly.

#### **Jeff Jaco:**

Your reading sixth sense will not betray an individual, why because this Algebraic Complexity Theory (Grundlehren der mathematischen Wissenschaften) reserve written by well-known writer who knows well how to make book that could be understand by anyone who read the book. Written inside good manner for you, still dripping wet every ideas and publishing skill only for eliminate your own hunger then you still uncertainty Algebraic Complexity Theory (Grundlehren der mathematischen Wissenschaften) as good book not only by the cover but also by content. This is one publication that can break don't assess book by its cover, so do you still needing another sixth sense to pick this!? Oh come on your examining sixth sense already alerted you so why you have to listening to an additional sixth sense.

#### **Lisa Loo:**

You will get this Algebraic Complexity Theory (Grundlehren der mathematischen Wissenschaften) by visit the bookstore or Mall. Only viewing or reviewing it might to be your solve trouble if you get difficulties on your knowledge. Kinds of this reserve are various. Not only by simply written or printed but can you enjoy this book by simply e-book. In the modern era just like now, you just looking because of your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose right ways for you.

#### **Angel Sullivan:**

A lot of people said that they feel weary when they reading a reserve. They are directly felt the idea when they get a half portions of the book. You can choose the book Algebraic Complexity Theory (Grundlehren der mathematischen Wissenschaften) to make your own reading is interesting. Your own skill of reading ability is developing when you just like reading. Try to choose simple book to make you enjoy to see it and mingle the opinion about book and looking at especially. It is to be very first opinion for you to like to open a book and examine it. Beside that the guide Algebraic Complexity Theory (Grundlehren der mathematischen

Wissenschaften) can to be your friend when you're truly feel alone and confuse with what must you're doing of their time.
