Power of the Periodic Table shows the reader how to visualize, understand and predict which chemical reactions may or may not occur, under what conditions of temperature and pressure, and how fast - to see clearly the roles of electronic structure, molecular structure, bonding and thermodynamics. It follows a pathway of those mental challenges which must be met, structures of thought which must be formed to reach that level of understanding, a pathway through the center of chemistry touching on the origins and effects of that knowledge. So doing, it illuminates the ways of the scientist, thinking, learning and feeling about this wondrous cosmic reality. Entirely readable and substantive, it is written for those who say, "I want to know that." Its best audience so far has been doctors, engineers, teachers, and bright students.
